

WHEEL SEALS

ENDURANCE™ LEATHERPRO™ SERIES

The Endurance™ LeatherPRO™ Series wheel seals are the choice of fleet professionals whose equipment may be older or those whose equipment operates in difficult, harsh and colder operating environments. The two-piece design and leather sealing lips provide enhanced performance in dusty and dirty environments while its new heavy duty running surfaces provide better performance on worn spindles.

Benchmark tests prove the Endurance LeatherPRO is 3X better than the nearest competitor:

- Seals were subject to 1,400-hour tests, simulating one year of use
- 100% of Endurance LeatherPRO seals passed
- Only 33% of competitor seals passed

FEATURES

- Lay down polymer impregnated leather lip performs better in difficult and harsh conditions (-65°F to 250°F, -55°C to 120°C)
- Oversized double-walled, reinforced metal OD, and zinc phosphate inner and outer cases
- Additional corrosion proof contaminant exclusion wiper
- Comes with HD Severe Service sleeve
- Meets or exceeds performance and warranty features of all other competitors' wheel seals

BENEFITS

- Provides superior sealing benefits on damaged and worn axle shoulders
- Outperforms nitrile seals in cold and contaminated environments
- Performs well with all synthetic oils and all greases
- Polymer impregnated leather seal lip
- Oversized metal OD directs heat transfer away from lip into the hub bore
- Zinc phosphate inner and outer cases are corrosion proof and coated with black bore sealant
- Severe service sleeve protects the hub from damage during seal removal and provides a new running surface for worn or damaged axle spindles
- Great for extreme thermal properties
