

# SCHOOL BUS SEALS AND WHEEL-END COMPONENTS

Amsted Seals® wheel-end products are designed to all work together – to fit right, install easily and perform at their best. For distributors, having a single supplier for wheel-end systems simplifies the selection, buying and stocking processes.

## Ultimate™ Series Wheel Seals

The Ultimate™ Series wheel seal provides faster and more error-free installations than conventional heavy duty wheel seals and comes with a 2-year warranty. This long-life seal is easily installed with any flat tool and features HNBR (premium nitrile) sealing surfaces on both the ID and OD surfaces.

Drive: 65552 / 65556

## Pinion Seals

Amsted Seals® pinion seals – available in one- and two-piece models – are the choice of OEMs, drive line rebuilders and service shops throughout North America and service shops throughout North America.

## Premium Bearings

Amsted Seals® premium bearings are manufactured using state-of-the-art technology with precise roller geometry and contact profiles that reduce component stresses under severe loading conditions for long-life service and superior quality.

Drive: DR-00-N-02 / DR-00-N-01

## Hub Caps

Amsted Seals® offers one of the broadest arrays of hub caps available, including caps for both grease and oil applications as well as caps compatible with hubodimeters and auto-fill systems.

Steer: 80024

## Hubodimeters

Hubodimeters – available as analog or electronic – provide the accurate information needed to alert you that it is time to bring a unit in for service.

46500M Mechanical / 47000 Electronic

## Dial Indicators

A simple tool that enables mechanics to easily and accurately verify wheel end-play after wheel bearing adjustment has been completed, helping to prolong the life of both the wheel seal and bearing.
